FOR IMMEDIATE RELEASE

September 12, 2022

HANS BERGENHEIM ASSUMES THE POSITION AS HEAD OF BOARD AT ANNEVO.

Annevo is rapidly growing and now fortifying the Board of directors with a highly professional profile.

The innovation- and technology-focused consultant company Annevo AB is aiming to realize people and their ideas. Through the in-house concept accelerator Annevo startup studios, five successful startups are currently connected.

"Together is a keyword in the Annevo organization, and the entire team constantly works for common success. This mindset attracted me to join the community myself. The future is bright for this client-focused company, capable of attracting and retaining skillful employees. I will bring focus, unity, and experience to the Board. All favoring the development and growth of the greatest workplace we can possibly imagine." - Hans Bergheim, Head of Board ANNEVO

Entering a phase of steep development where the company will reach 100 msek in revenue in the upcoming year and double down on the investments in different startup projects, Annevo is preparing all teams for the upscaling, including the board of directors.

"Hans will bring extensive experience from both a leadership- and growth perspective. He holds great expertise in finance and as head of board in various successful companies. I believe in getting the best possible support for the Annevo board and for me as CEO, in order to excel in the next phase in the development of Annevo and to reach our long-term goals.

With a stronger board, that we will continue to build, we will be able to tackle the uncertain times in the best way possible." - Elias Gustavsson, CEO ANNEVO.
